I hope it really does get the recognition it justly deserves!”

“A stunning masterpiece of a book. I love the many rare old photos. This book contained all the information I was missing, as I have been hunting information about United’s results, goal scorers and line-ups in the Youth Cup for more than a decade.”

“In the last 50 years many dozens of books have been written about United, but very few could be described as truly ground-breaking. Until now I would have said only two came into that category – Manchester United A Complete Record 1878-1986 and The Forgotten Fixtures. But ‘Sons of United’ by Steve Hobin and Tony Park is certainly a truly ground-breaking achievement too.”

“Charting the development of the United youth system since the 1930s, it is thoroughly researched, incredibly detailed and profusely illustrated. It includes reports on all of United’s Youth Cup matches and provides fascinating biographies of dozens of youth players past and present. It would be an ideal gift for any United fan, but anyone interested in the development of footballing talent will find this magnificent book engrossing too.”

“Jam packed full of rare, or indeed unique, photo’s of past games, team photo’s and memorabilia it is a must read for anyone with even a passing interest in Manchester United.

The many years of research done by the authors is clear for all to see and they must be commended for their dedication in tracking down hundreds of ex players so they could be asked about their memories of past encounters.

This book will give me many, many hours of pleasure whilst reading it and will be used as a reference book by many for years to come.”
